

## D - Neuro - Ataxia

Please complete the survey below.

Thank you!

### 1. Gold Standard Diagnosis

Does the participant have ataxia?

- ☐ Yes  
☐ No  
☐ Not certain

### 2. Ataxia Type

What is the predominant ataxia type?

- ☐ Cerebellar (central)  
☐ Sensory (proprioceptive loss predominant)  
☐ Vestibular (balance or vertigo predominant)  
☐ Mixed or unclear  
☐ Other  
☐ Unknown

Other

Please specify:

How was this diagnosis confirmed? Select all that apply.

- ☐ Neurologist  
☐ Movement disorders specialist  
☐ Other specialist  
☐ Hospital discharge summary  
☐ Problem list or ICD code  
☐ Participant self-report  
☐ Unknown

Neurologist

Date of most recent documentation supporting ataxia:

Movement disorders specialist

Date of most recent documentation supporting ataxia:

Other specialist

Please specify:

How was ataxia supported or confirmed? Select all that apply.

- ☐ History or repeated exam documents gait, truncal, or limb incoordination
- ☐ Objective neurological exam signs are consistent with ataxia (examples: dysmetria, dysdiadochokinesia, dysarthria, nystagmus)
- ☐ Reasonable evaluation was done to exclude major alternative explanations (examples: sensory loss, weakness or spasticity, intoxication or medication effect) or to classify the type with supporting findings
- ☐ Severity quantified using a standardized ataxia scale (examples: SARA, ICARS, or FARS)
- ☐ Supporting testing performed (examples: MRI findings consistent with cerebellar pathology, or relevant labs or genetic testing depending on suspected cause)
- ☐ Unknown

Validated Ataxia Result

### 3. Etiology

What is the etiology? Select all that apply.

- ☐ Genetic or hereditary
- ☐ Degenerative, non-hereditary
- ☐ Sporadic onset ataxia
- ☐ Vascular (example: stroke or hemorrhage)
- ☐ Autoimmune or paraneoplastic
- ☐ Toxic, medication-induced, or alcohol-related
- ☐ Metabolic or nutritional
- ☐ Infectious or post-infectious
- ☐ Structural lesion (example: tumor or malformation)
- ☐ Other
- ☐ Unknown

Genetic or hereditary

List gene or mutation if known:

\_\_\_\_\_

Other

Please specify:

\_\_\_\_\_

### 4. Presentation and severity

Course pattern:

- ☐ Acute (hours to days)
- ☐ Subacute (days to weeks)
- ☐ Chronic or progressive (months to years)
- ☐ Unknown

Does ataxia present as episodic or chronic? (Choose all that apply)

- ☐ Episodic
- ☐ Chronic
- ☐ No
- ☐ Unknown

---

Clinical presentation (select all that apply):

- ☐ Gait imbalance or wide-based gait
- ☐ Limb incoordination (e.g. dysmetria on target testing, dysdiadochokinesia)
- ☐ Changes in speech (e.g. dysarthria)
- ☐ Truncal instability
- ☐ Dysphagia
- ☐ Oculomotor abnormalities (nystagmus, abnormal pursuit, saccadic dysmetria)
- ☐ Prominent sensory loss or proprioceptive impairment
- ☐ Prominent vertigo or dizziness
- ☐ Other
- ☐ Unknown

---

Other

Please specify:

---

---

Please provide scores or results from standardized ataxia scales (select all that apply).

- ☐ SARA score available
- ☐ ICARS score available
- ☐ FARS score available
- ☐ Functional mobility stage available
- ☐ Other scale
- ☐ Not available

---

SARA score available

SARA total score (0 to 40):

---

---

ICARS score available

ICARS total score (0 to 100):

---

---

FARS score available

FARS total score (0 to 125):

---

---

Other scale

---

Identify scale:

---

---

Total score:

---

---

Functional mobility stage:

- ☐ Ambulatory without aid
- ☐ Ambulatory with aid (cane or walker)
- ☐ Wheelchair-dependent
- ☐ Bedbound or total assistance

**5. Imaging and diagnostic tests**

EMG or NCS performed?

- ☐ Yes  
☐ No  
☐ Unknown

Please specify test

- ☐ EMG  
☐ NCS

Test results:

- ☐ Normal  
☐ Abnormal  
☐ Unknown

Key findings (optional):

---

Vestibular testing performed?

- ☐ Yes  
☐ No  
☐ Unknown

Test results:

- ☐ Normal  
☐ Abnormal  
☐ Unknown

Key findings (optional):

---

Tests performed (select all that apply)

- ☐ Brain MRI  
☐ Genetic testing  
☐ Acquired ataxia workup  
☐ Relevant labs performed (metabolic, nutritional, autoimmune, blood, CSF, or serum)  
☐ Other testing

Brain MRI results:

- ☐ Normal  
☐ Abnormal  
☐ Unknown

Abnormal

- ☐ Cerebellar atrophy  
☐ Brain stem atrophy  
☐ Other abnormalities

Other abnormalities

Please specify:

---

Key findings (optional)

---

Genetic testing

Please specify test

---

Genetic testing results:

- ☐ Normal  
☐ Abnormal  
☐ Unknown

---

Key findings (optional)

---

---

Acquired ataxia workup

---

---

Please specify test

---

---

Ataxia workup results:

- ☐ Normal  
☐ Abnormal  
☐ Unknown
- 

---

Key findings (optional)

---

---

Relevant labs performed (metabolic, nutritional, autoimmune, blood, CSF, or serum)

---

---

Relevant labs (select all that apply):

- ☐ Metabolic  
☐ Nutritional  
☐ Autoimmune  
☐ Blood  
☐ CSF  
☐ Serum  
☐ Other
- 

---

Metabolic

Identify key results:

Please specify test:

---

---

Identify key results:

---

---

Other testing

---

Please specify test:

---

Other testing results:

- ☐ Normal  
☐ Abnormal  
☐ Unknown
- 

Key findings (optional):

---

## 6. Treatment

Has the participant received any treatment or therapy for ataxia?

- ☐ Yes  
☐ No  
☐ Unknown
- 

Select all treatment types that apply:

- ☐ Rehabilitation therapies (PT, OT, speech therapy)  
☐ Assistive devices (cane, walker, wheelchair)  
☐ Etiology-targeted treatment (if applicable)  
☐ Other
- 

Etiology-targeted treatment (if applicable)
